Career Objective

Full-Stack Web Developer specializing in the MERN stack with hands-on experience building scalable web applications from frontend UI to backend APIs. Strong expertise in React.js, Next.js, Node.js, MongoDB, and RESTful services. Proven ability to implement authentication systems, payment gateways, admin dashboards, and production-ready deployments. Passionate about clean architecture, performance optimization, and user-focused solutions.

Technical Skills

Frontend: React.js, Next.js (App Router), HTML5, CSS3, JavaScript (ES6+), TanStack Query

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Database: MongoDB, Mongoose

Auth & Payments: Firebase Auth, NextAuth.js, Stripe API

Styling/UI: Tailwind CSS, DaisyUI, Framer Motion, Responsive Design

Tools & DevOps: Git, GitHub, Vercel, Netlify, VS Code

Full-Stack Projects

Digital Life Lessons | *MERN, Stripe, Firebase*

- Designed and developed a full-stack SaaS platform with free and premium subscription models.
- Built REST APIs with Node.js and Express, handling authentication, payments, and role-based access.
- Integrated Stripe for secure subscriptions and automated payment workflows.
- Implemented an admin dashboard for analytics, user management, and content moderation.
- [Live Demo](#) | [Client Code](#) | [Server Code](#)

PlateShare | *React, Node.js, MongoDB, Firebase*

- Developed a full-stack food-sharing platform enabling real-time donation management.
- Designed MongoDB schemas and backend APIs for requests, donations, and user activity.
- Implemented Firebase authentication with social and email login support.
- Built a responsive UI ensuring cross-device compatibility and performance.
- [Live Demo](#) | [Client Code](#) | [Server Code](#)

Hero Kidz | *Next.js, MongoDB, NextAuth*

- Built a production-ready full-stack e-commerce platform using Next.js App Router.
- Implemented role-based authentication with NextAuth (Admin and User access).
- Developed checkout flow, persistent cart, and automated email notifications.
- Optimized server-side rendering and database queries for better performance.
